

Polycom® WebCommander™

Scheduling, monitoring, and managing MGC™ conferences

Benefits

Ready whenever you are – Start an ad hoc meeting immediately or schedule a future conference

You're in control – Manage an active meeting or view upcoming schedules through a single login window

Full conference support – Schedule and manage VoicePlus, VideoPlus and Unified Conferences

Utilize powerful administrator tools – Multiple MCU support and monitoring screen for Polycom WebOffice™

Security – Encrypted login and password, administrators set specific profile authorization rights

Now you can control all aspects of setting up and running conferences on Polycom MGC products. Polycom WebCommander improves productivity by making multipoint conferencing easy for everyone in your organization.

Through a Web browser, users access Polycom WebCommander to quickly create and initiate conferences. Whether a meeting is starting immediately or in the future, Polycom WebCommander automatically selects the necessary resources. In addition, Microsoft® Outlook® can be used to create appointment details and send e-mail notifications to participants.

By connecting to the MGC, screen updates are made in real time, including changing screen layouts, adjusting audio volume, connecting new participants, and more. The environment can be customized with graphics, languages, logos, and color schemes. To maintain system security, registered users need a login and password to access Polycom WebCommander.

The single-platform choice for The Polycom Office™

With integrated video, voice, data, and Web capabilities, The Polycom Office is the only solution that offers you an easy way to connect, conference, and collaborate any way you want. The Polycom Office is our commitment to making distance communications as natural and interactive as being there. Work faster, smarter, and better with Polycom WebCommander and The Polycom Office.

Web *Connect. Any Way You Want.*

WebCommander packages

The various WebCommander packages provide users with the precise capabilities they need for controlling multiple MCUs and gateways across diverse networks.

WebCommander Professional

The WebCommander Professional combines Meeting Director and Meeting Scheduler, allowing full conference management and scheduling capabilities. Access to individual functions is based on the user's defined profile.

- Combined package including Meeting Director, Meeting Scheduler, and MGC Personal Scheduler

WebCommander Meeting Director

Meeting Director provides users with the means to monitor and manage their own conferences. Conference management functions and the depth of information displayed are based on the authorization rights assigned to a user's profile.

- View conference and participant connection status
- Adjust audio volume of participants
- Initiate/terminate conference
- Connect/disconnect participants
- Add participants to conference
- Change video layouts
- Mute participant audio and video
- Extend conference duration
- Lock conference

WebCommander Meeting Scheduler

Meeting Scheduler provides access to scheduling conferences in addition to creating and modifying conference databases.

- Schedule conferences
- Send email notifications to participants
- Create and manage database of predefined conference templates
- Create and manage database of predefined participants

MGC Personal Scheduler

The MGC Personal Scheduler package enables full video and audio conference scheduling support for Microsoft Outlook. Users may schedule conferences using Outlook's scheduling features.

- New Appointment
- Select multiple MCUs
- Select number of participants
- Modify appointment parameters
- Select WebOffice to combine Web collaboration address

With all the packages you receive:

WebCommander Profile Manager

Profile Manager is a utility that allows a system administrator to set user profiles in WebCommander.

WebCommander Gateway Monitor

Gateway Monitor is a utility that allows a system administrator to monitor gateway sessions in WebCommander.
